

Accidents Happen: Toileting Teaching Tips

We know you will be working towards independent toileting before school starts in September, but accidents do happen!

Things for your child to practice doing independently when using the toilet:

- Pulling pants up and down.
- Positioning themselves to use the toilet.
- Wiping independently.
- Flushing the toilet.
- Washing their hands.

Don't Forget the Flush!

Many students struggle with automatic flushing toilets. Consider using public washrooms with your child so they get used to the automatic flush feature.

And remember, accidents do happen! Please **send a change of clothes** for your child, so we are ready to support when they do.
